EXPERIENCE

Prytaneum — August 2021 - Present
Web Developer - prytaneum.io — *Riverside, CA*

· Developed a responsive UI/UX, using NextJS, MaterialUI, and TypeScript, for a unique medium where town officials and constituents can practice fair democracy
· Fixed 15+ bugs including form validation, user actions, and layout consistency
· Helped build the backend for user actions using Prisma, GraphQL, and TypeScript

Citrus Hack — June 2021 - Present
Full-Stack Developer, Web Development Lead - cutiehack.io, citrushack.com — *Riverside, CA*

· Spearheaded the development of the Cutie Hack and Citrus Hack websites, with a 10+ member team
· Implemented a clean accessible UI/UX using NextJS and CSS Modules for the Cutie Hack website
· Designed and developed important components including navigation bars, live countdown clocks, forms, and user pages/actions
· Built the backend using TypeScript and MongoDB, creating secure data transfers

BioHack — July 2021 - Present
Full-Stack Developer, Web Development Lead - biohackucr.com — *Riverside, CA*

· Designed and developed the BioHack website using NextJS, TailwindCSS, and Framer Motion providing a seamless and accessible UI/UX
· Built the backend using TypeScript and MongoDB, creating secure data transfers

Lotus Hacks — May 2021 - Present
Full-Stack Developer, Web Development Lead - lotushacks.com — *Riverside, CA*

· Designed and developed the Lotus Hacks website using a modern tech stack including NextJS, TailwindCSS, CSS Modules, TypeScript, and MongoDB
· Implemented important features like protected user pages/actions, user registration/authentication, and a clean accessible UI/UX

PROJECTS

Portfolio — January 2021 - Present
Frontend Developer - jspescas.io

· A personal website to showcase my projects and who I am as a person
· Developed using NextJS, CSS Modules, and Framer Motion providing a clean accessible UI/UX
